

# Just Ask Zesty

Instant answers.  
Real actions.

**Zesty is an AI-powered concierge experience** built for senior living: voice-friendly, intuitive, and embedded into your community operations.

### Deploy voice without the hardware.

Zesty brings voice to the mobile experience residents already use. No smart speakers, no set up required.

Wellzesta powers the system.  
Zesty makes it speak.

**Ask naturally. Get it done.** Zesty makes your community experience accessible through conversation, like talking to a concierge who turns everyday needs into completed requests.

### One connected resident experience.

Announcements, event calendars, menus, and resident accounts live in one ecosystem, so residents get consistent answers and staff stay aligned.

Sign me up for next week's picnic.

Done! You are registered for the **Riverfront Park Hiking Trip & Picnic** next Thursday, June 18, from 10 AM to 12:30 PM.

It costs \$7 and includes a scenic group hike followed by a picnic lunch. Remember to wear comfortable sneakers!

Wellzesta

[Start a conversation. Book a demo today.](#)

Residents ask and the system responds end-to-end, with Zesty providing a voice-first way to access messages, register for events, browse menus, and record wellness data.

What are the dining specials today?

The lunch special at Mama Risata's today is **French Onion Soup**.

For dinner at Beatrice's, the special is **Lemon Herb Chicken**.

## A great concierge...

- answers questions quickly & confidently
- knows what's happening today
- routes requests without making you navigate the building

## Zesty gets it done

- retrieves menus, messages, and events instantly
- manages resident event sign ups
- connects residents with information within the app - no searching or scrolling required.

## Engagement that drives participation.

Zesty helps residents move from "What's happening?" to "I'm registered" in seconds; so your community doesn't just post updates, it gets outcomes.

## Voice-powered autonomy.

Zesty expands access and supports independence for a broader set of residents by providing a first-class, voice-powered interface built for the phones and tablets they already know.
